# How to use Lactose Broth SensiMedia for Coliform Detection

MicroBio Corporation

### 1. General Description

This SensiMedia uses Lactose Broth as liquid media.

#### 2. Detection Procedure

### Add sample

Open a cap of SensiMedia and add 1ml of sample. Close a cap and place it in an incubator.

## **Incubate Temperature**

Incubate the sample added SensiMedia at 35 degrees C.

#### 3. Detection Criteria

The performance characteristic of liquid medium is shown in graph below. Refer to it and set up a protocol for the test. When the color of CO<sub>2</sub> sensor turns into yellowish transparent, Coliforms are detected.
